Pool installed July, 2005.

I love my Gibraltar pool because of how easy it is to take care of. When they say that it is virtually self cleaning that is the absolute truth. I only vacuum it 3 times a year, once when I open it for the new season, once about mid season and finally when I close it for the winter. Other than adding chemicals once a week the rest of the time is for me and my family to enjoy.

Another reason I love my Gibraltar pool is how it blends into the landscape of my home and how attractive a pool it is. It looks so natural as if it has always been there. And finally it is like having your own little slice of heaven. My family just loves the idea of having their own little resort just a few steps away from our back door. And with the high price of gas we save plenty of money with no travel involved.

We love our Gibraltar pool. Thanks Gibraltar for making such a great pool.
