Pool installed July, 2003.

There are many reasons why we love our Gibraltar Pool. First, it is essentially maintenance free due to its self cleaning filtration system. We never have to vacuum it. The construction and quality of the pool is outstanding. The deck is great. We love the fact that it wraps around the entire pool and it's big enough to walk around. Most importantly, we feel like we have a tropical resort in our backyard. We have also added underwater lighting for night swimming. It gives our backyard that added ambiance when we sit outside at night and see that our pool is illuminated making it that much more special to enjoy.
